Lucas Tyra Morten

Lucas Tyra Morten is a multidisciplinary atelier whose practice spans collectible design, sculpture, and functional art. Working at the intersection of craftsmanship and contemporary design, the studio creates handmade furniture, lighting, and sculptural objects that explore materiality, process, and the emotional resonance of everyday forms. Produced in limited editions, each work embraces the individuality of handcraft, celebrating tactile surfaces, organic imperfections, and the quiet beauty of making. Guided by a philosophy that values authenticity over industrial perfection, Lucas Tyra Morten develops works distinguished by restrained forms, honest materials, and a sculptural sensitivity to space. Rooted in experimentation and traditional craftsmanship, the studio blurs the boundaries between furniture, sculpture, and architecture, creating timeless objects that invite contemplation and a deeper connection between people, material, and their surroundings. Their work has been presented internationally at design fairs and exhibitions including Miami Design, Milan Design Week, and Pièces Uniques Paris.
