## Jules Desdoigts

Jules Desdoigts is a French designer whose practice explores the relationship between structure, material, and gesture. After more than a decade working alongside Christian Liaigre, he founded his studio in Paris in 2021. His work focuses on sculptural furniture and objects, often realized in bronze, where precise lines meet softened, almost organic forms. Rooted in a deep understanding of proportion and craftsmanship, Desdoigts' pieces balance restraint and presence, existing at the intersection of functional object and sculpture.
