DESIGNER

Brajak Vitberg

Brajak Vitberg is a multidisciplinary design studio founded in 2019 in Ljubljana by architects Petra Brajak and Robert V. Bijelić. Working at the intersection of art, architecture, and collectible design, the studio creates furniture, lighting, and objects distinguished by their sculptural forms, material sensitivity, and strong conceptual foundation. Guided by a commitment to craftsmanship and experimentation, Brajak Vitberg develops pieces that balance artistic expression with functional purpose. Through close collaboration with local artisans and manufacturers, the studio explores the possibilities of material and form, resulting in works defined by tactile richness, refined detailing, and a contemporary design language.
