Egg Designs

Egg Designs is a South African design studio founded by Greg and Roche Dry, whose practice explores the intersection of contemporary furniture, lighting, and African craftsmanship. Based in Durban, the studio creates collectible pieces distinguished by sculptural forms, rich materiality, and a design language deeply rooted in the cultural heritage of the African continent. Through a refined balance of tradition and innovation, Egg Designs develops works that celebrate both function and narrative. Guided by a philosophy that every object should possess an enduring story, Egg Designs collaborates with skilled local artisans to transform traditional craft techniques into contemporary expressions of luxury. Combining exceptional craftsmanship with bold creativity, the studio creates timeless furniture and lighting that embody authenticity, material richness, and the evolving dialogue between African heritage and international design.
