DESIGNER

Chanel Kapitanj

Belgian designer Chanel Kapitanj, born in Lige in 1992, channels her passion for materiality into metallic furniture and objects of arresting physicality. Trained in industrial design, Kapitanj pursued specialized skills as a metalworker and welder, enabling a hands on approach to every

creation. Her practice is rooted in an ongoing fascination with the expressive possibilities of metal, resulting in works that are at once robust, refined, and deeply personal, seamlessly merging utilitarian technique with poetic sensibility.
