Studio Nicolas Erauw

Nicolas Erauw is a Belgian designer based in Sint-Niklaas, whose practice investigates the intersection of industrial processes and material experimentation. He graduated from the Royal Academy of Fine Arts in Ghent in 2017, specializing in furniture design, where he developed a research-driven approach grounded in making and technical inquiry. Erauw’s work focuses on uncovering new possibilities within industrial manufacturing, pairing standardized production methods with raw, often uncompromising materials. Through this juxtaposition, he seeks to generate unexpected outcomes—objects that challenge conventional perceptions of finish, precision, and material value. By allowing process to play an active role in shaping form, Erauw’s designs reveal both control and contingency. The resulting furniture occupies a space between refinement and rawness, where industrial logic is reinterpreted through experimentation. His practice reflects a contemporary approach to design—one that embraces manufacturing not merely as a means of production, but as a creative tool capable of producing distinct and expressive results.
