DESIGNER

Goons

Goons is a Paris-based design studio founded in 2019 by architect Paul Trussler and designer-editor Mia Kim. The studio creates bold, sculptural furniture and objects that balance refined simplicity with quiet sophistication. Paul's architectural background, shaped by formative years with Frank Gehry and his own studio practice, together with Mia's multidisciplinary

experience in fashion and creative direction, informs a practice that blends high craftsmanship with playful pragmatism. Often working with humble or reclaimed materials such as plywood, Goons distills designs to their essence, exploring volume, form, and utility with meticulous precision.
