DESIGNER

John Eric Byers

John Eric Byers is an American designer and master craftsman whose collectible furniture explores the sculptural potential of solid wood through carving, texture, and form. Having apprenticed with renowned furniture maker Wendell Castle, Byers has developed a distinctive design language defined by hand-carved surfaces, bold geometries, and a deep respect for traditional woodworking techniques. His pieces reveal a meticulous attention to proportion and material, allowing light and shadow to animate every carefully crafted surface. Working from his studio in upstate New York, Byers creates limited-edition furniture that balances sculptural presence with quiet functionality. Guided by a commitment to craftsmanship and material honesty, his work transforms wood into timeless objects distinguished by tactile richness, refined simplicity, and a profound sense of permanence.
