DESIGNER

John Eric Byers

American craftsman and designer John Eric Byers transforms solid wood into compelling, tactile geometries that invite both touch and contemplation. A former apprentice to furniture master Wendell Castle, Byers has spent decades refining a personal language of hand-carved texture, crisp form, and rich matte finishes. His work, often monochromatic, commands attention through quiet authority rather than ornament, relying on the interplay of

light across meticulously chiseled surfaces. Working from his studio in upstate New York, Byers produces limited pieces that inhabit the rare space between furniture and sculpture. His creations are imbued with a meditative quality, reflecting a deep connection between the discipline of craft and the intimacy of the handmade object.
