DESIGNER

Alex de Witte

Born in 1976 on the southwest coast of the Netherlands, Alex de Witte's artistic journey began with the vastness of the sea and the shifting interplay between nature and perception. After graduating from the Artemis Academy in Amsterdam, where he delved into the universal values of beauty among humans and animals, de Witte embarked on a quest to challenge and transform the collective sense of what is beautiful. His practice explores symmetry, harmony, and the so called initial moment of things, capturing the perfect instant in both form and emotion. De Witte's celebrated works, including the award-winning Big Bubble lamp and the ethereal Light Breeze merge technical mastery with a poetic sense of wonder, inviting viewers to reconsider their perceptions of familiar objects and forms.
