DESIGNER

Studiopepe

Founded in Milan in 2006 by Arianna Lelli Mami and Chiara Di Pinto, Studiopepe is a multidisciplinary architecture and design studio known for its visionary and emotionally charged approach. Working across interiors, product design, and creative direction, the studio balances formal precision with poetic surprise, embracing material “cross-pollination” and a layered narrative sensibility. Their work spans luxury retail and hospitality environments to immersive installations. A notable example is

their Milan Design Week project Les Arcanistes: The Future Is Un/Written, a sprawling, mystical journey through tarot-inspired rooms, where custom furnishings and symbolic spaces map matter onto archetype. Studiopepe’s practice unfolds between the sensual and the cerebral—where furnishing and storytelling intertwine to create richly layered environments that resonate as much in memory as in space.
