DESIGNER

Jude Di Leo

American designer Jude Di Leo explores the relationship between function, texture, and narrative through a practice that spans furniture, lighting, and sculpture. Working primarily with bronze, steel, and stone, Di Leo's creations merge a rugged, almost primal presence with contemporary refinement. Often produced in

limited series, his works are designed to age gracefully, developing patinas that document their passage through time. Di Leo's approach favors bold forms and strong material statements, resulting in objects that are both utilitarian and totemic.
