DESIGNER

Canoa Lab

Based in Spain, Canoa Lab crafts ceramics that echo the forms and textures of ancient Iberian, Roman, and Greek artifacts. Each piece is hand formed from local clay, marrying slow, deliberate production with a deep study of historical material culture. Their work extends beyond pottery into

hybrid explorations of metal and clay, reimagining age old techniques through contemporary experimentation with glazes, beeswax, and casting. The result is a practice that feels both archaeological and modern, charting a tactile dialogue between past and present.
