Estudio Persona

Estudio Persona is a Los Angeles–based design studio founded by Emiliana Gonzalez and Jessie Young, whose practice explores the intersection of collectible furniture, sculpture, and architecture. Established in 2017, the studio creates refined furniture distinguished by clean geometries, sculptural forms, and a restrained material palette. Drawing on their backgrounds in industrial design, fine art, and interiors, Gonzalez and Young develop pieces that balance functional clarity with artistic expression. Guided by a minimalist sensibility and a deep appreciation for craftsmanship, Estudio Persona collaborates with skilled artisans to create timeless furniture and lighting that celebrate material honesty and meticulous detailing. Through thoughtful proportions, tactile materials, and enduring forms, the studio develops works that blur the boundaries between contemporary art and functional design while creating quiet yet distinctive spaces.
