Marmi Serafini

Marmi Serafini is an Italian marble design house rooted in the dialogue between Milan and Vicenza. Its Milan gallery brings together clients, architects, and designers, while its Vicenza factory transforms exceptional stone into refined works of design. Renowned for its mastery of complex three-dimensional forms, Serafini explores marble's expressive potential through a sophisticated balance of advanced technology and traditional craftsmanship. Each creation begins with a raw block, shaped through a meticulous process guided by precision, experience, and the skilled hands of Italian artisans. At the heart of Serafini's philosophy is a profound respect for craftsmanship and individuality. Rejecting standardized production, the company embraces bespoke design, working closely with clients and international designers to create pieces of enduring character. A young, dynamic team carries this vision forward, combining innovation with generations of Italian expertise. From the natural texture of the stone to the emotional presence of the finished work, every detail is thoughtfully considered, bringing the timeless spirit of Made in Italy to distinguished interiors worldwide.
