DESIGNER

InsidherLand

InsidherLand is a Portuguese design brand founded in 2012 by architect Joana Santos Barbosa, creating collectible furniture, lighting, and objects inspired by the beauty of nature and the narratives embedded within landscapes. Drawing from her architectural background, Barbosa translates natural phenomena, memories, and cultural references into sculptural forms distinguished by refined craftsmanship and rich materiality. Produced in Portugal, the collections celebrate traditional techniques including fine woodworking, marquetry, metalwork, and upholstery. Guided by a poetic and deeply personal design approach, InsidherLand creates pieces that balance sculptural presence with everyday functionality. Each design tells a story, transforming landscapes, textures, and moments of discovery into timeless objects that embody craftsmanship, emotional resonance, and contemporary elegance.
