### DESIGNER

## Imperfettolab

From Gambettola, Italy, Verter Turroni and Emanuela Ravelli have built Imperfettolab into a workshop of sculptural imperfection. Fiberglass is cast in common molds, then hand-finished so that each piece becomes unique—its surface marked by the traces of its making. These furnishings,

part art object and part functional tool, defy mass-produced uniformity. In their organic shapes and deliberate irregularities, they encourage a different kind of beauty—one that embraces variation, process, and the human hand.
