Bocci

Bocci is a Canadian design and manufacturing studio founded in 2005 by Omer Arbel and Randy Bishop. With studios and production facilities in Vancouver and Berlin, Bocci has become internationally recognized for its experimental approach to lighting, furniture, and architectural installations, where material exploration and craftsmanship play a central role. Rooted in a spirit of research and innovation, the studio develops works that challenge conventional production methods and reveal the expressive potential of materials. From its iconic blown-glass lighting pieces to large-scale spatial installations, Bocci creates objects that explore the relationship between light, form, and space, resulting in works that are both technically inventive and poetically engaging.
