DESIGNER

Bosc Design

Bosc Design is an extension of Bosc Architects, led by Arthur and Jean Bosc, specialists in the revitalization of Provençal mas, bastilles, and châteaux. Their product design arm arose from the need to fill renovation projects with singular, regionally inspired objects, morphing traditional craftsmanship into contemporary forms. The studios

work features an evocative blend of function and rustic elegance, shaped by the unique history and materiality of each site in southern France. Bosc Design continues to honor place specific heritage, translating centuries old narratives into timeless, livable design.
