Odditi

Odditi is a contemporary design studio creating furniture and lighting at the intersection of playfulness and modernist clarity. Its practice explores the relationship between form and function through experimentation, bold silhouettes, unexpected proportions, and inventive material combinations. Rather than following fixed conventions, Odditi approaches design as an open field for curiosity, discovery, and expression. Each piece is conceived as a curious collectible living object—designed to serve a purpose while also inspiring emotion and conversation. Sculptural forms and considered details create a distinctive language that balances usability with visual character. Produced in limited editions and handmade to order, Odditi's collections emphasize craftsmanship, individuality, and intentional making, giving each object a unique sense of presence. Through its experimental approach and refined execution, the studio challenges familiar ideas of everyday design, creating pieces that feel contemporary, expressive, and enduring. Recognized through select international design events, Odditi continues to explore new possibilities across furniture, lighting, and collectible design.
