### DESIGNER

## Markus Friedrich Staab

Markus Friedrich Staab is a German artist and designer renowned for his geometric and abstract furniture creations that blur the boundaries between collectible design and contemporary sculpture. Rooted in a fine arts background, his practice explores the dialogue between form, structure, and spatial composition, resulting in pieces defined by bold architectural lines, striking color palettes, and a refined sculptural presence. Working primarily with wood and meticulously applied painted finishes, Staab

transforms functional furniture into expressive artistic statements. Each creation is conceived not merely as an object of utility, but as a carefully composed work of art designed to command attention within an interior space. Through his distinctive visual language, he challenges traditional perceptions of furniture design, offering works that embody both aesthetic sophistication and functional purpose.
