## Tuğçe Geyik

Tuğçe Geyik is an Istanbul-based architect and designer whose multidisciplinary practice explores form, material, and atmosphere through a sensitive and intuitive lens. Trained in Architecture at Yıldız Technical University, she works across furniture and lighting design, interior architecture, visualization, styling, and creative direction. Rather than adhering to a fixed aesthetic, Geyik approaches each discipline as part of a fluid visual language, allowing ideas to move naturally between scales and mediums. Her work brings color, texture, and form together with the sensibility of a collage, drawing on a personal archive of materials and techniques rooted in the past while introducing forward-looking forms. Through this dialogue between material memory and contemporary expression, Geyik creates objects and spaces with a quiet yet distinctive presence. Her practice seeks to awaken a deeper awareness of inanimate objects, giving them character, narrative, and emotional resonance through a refined balance of intuition and intention.
