DESIGNER

Giorgio Bonaguro

With a foundation in mechanical engineering and a master's degree in design, Milan-based Giorgio Bonaguro moves fluidly between Europe and Brazil, creating furniture and lighting that balance linear clarity with sensuous materiality. His practice is research-driven, drawing from cultural narratives, industrial processes, and artisanal

skill. Whether in marble, brass, or wood, Bonaguro's pieces feel poised between restraint and expression. They are objects that invite contemplation, each one distilled to essential form while quietly showcasing the richness of its material origins.
