STOFF Nagel

STOFF Nagel is a Danish design brand dedicated to the revival of the iconic modular candle holder originally designed in the 1960s by Werner Stoff for Hans Nagel. Faithfully reissued from the original drawings, the collection embodies the clarity and precision of Scandinavian modernism. Defined by its stackable, modular system, each element allows for endless compositions—transforming a functional object into a sculptural, architectural form. The collection extends to candle holders, bowls, and vases, conceived as part of an open system that invites personal expression while maintaining a strong, timeless design language.
