MATERIALS	Marble, Stone, Wood, Travertine

### DESIGNER

## Alex Turco

Alex Turco is an Italian art designer working at the intersection of art, design, and architecture. His practice centers on large-scale surfaces and sculptural panels, combining photography, digital processes, and hand-applied materials such as resins and minerals. Conceived in dialogue

with architecture, his works are designed to integrate seamlessly into interior spaces. Blurring the boundary between artwork and environment, Turco develops a distinctive visual language defined by texture, depth, and material experimentation.
