DESIGNER

ODA LIK Studio

ODA LIK is a Paris-based design studio founded by architect Sandra Lipovetsky, working at the intersection of art, design, and architecture. The studio develops a multidisciplinary practice spanning retail concepts, interiors, and sculptural objects, where design is approached as a tool to shape perception and emotion. Rooted in a sensitivity to material and space, each project explores the relationship between light,

colour, and visual experience. Through the use of reflective materials, light, and spatial composition, ODA LIK creates pieces that shift with movement and context, blurring the boundary between object and experience. Its work is defined by a strong visual language and a focus on atmosphere, transformation, and sensory engagement.
