Fict Studio

FICT STUDIO is a South Korean collectible design studio founded in 2016 by designer Heakyoung Jang. Guided by the philosophy of “From Craft to Industry,” the studio explores the intersection of traditional craftsmanship, material experimentation, and contemporary design. Through collectible furniture and sculptural objects, FICT STUDIO develops a distinctive visual language characterized by layered textures, translucent finishes, and organic forms that reveal the expressive potential of innovative materials. Balancing artisanal processes with contemporary production, the studio creates works that combine sculptural presence with refined functionality. Defined by tactile surfaces and a strong sensitivity to materiality, FICT STUDIO’s pieces invite both visual and sensory engagement while reflecting a thoughtful dialogue between craft, technology, and contemporary collectible design.
