Fict Studio

FICT STUDIO is a South Korean collectible design practice founded in 2016 by designer Heakyong Jang. Rooted in the philosophy of "From Craft to Industry," the studio explores the dialogue between traditional craftsmanship, material experimentation, and contemporary sculptural design. Through furniture and objects, FICT STUDIO develops a distinctive aesthetic language defined by layered textures,

translucent surfaces, and organic compositions. Balancing raw materiality with refined contemporary expression, the studio's work evokes both emotional resonance and sensory experience. FICT STUDIO has been exhibited internationally, including at Maison & Objet, Dutch Design Week, London Design Fair, and Lake Como Design Fair.
