Milan, Italy

Desacrealised

18-23 April. San Vittore E 40 Martiri, Viale Lucania 18

Aside from its galleries in Geneva, Mexico, New York and Singapore, collectible design specialist Galleria Philia has become an expert at staging pop-up exhibitions in highly atmospheric locations. The latest takes place in a deconsecrated church dating back to the 11th century, more recently used as a basketball court and community space. Twenty designers present pieces that respond to the now-secular nature of this once-holy structure, all produced in white. Among them are a “decrealised” chair by fashion designer Rick Owens and monumental works by Italian duos Morghen Studio and Studio Pepe.
