The Reveries is an enchanting exhibition by contemporary designer Elsa Foulon, showcasing her groundbreaking ceramic creations during New York Design Week.

The Reveries perfectly capture the essence of Elsa Foulon's work. This exhibition invites viewers to step into a dreamlike world where organic forms and sculptural beauty come together, blurring the line between art and design. Through The Reveries, Elsa explores the beauty of the fleeting moment, inviting contemplation on the delicate balance between thought and creation. The soft, flowing lines of her ceramics are not merely objects—they are meditations on space, light, and texture.
